

OUTDOOR FIRE

High quality cast iron garden fire

High quality garden fire

Atmospheric light, pleasant warmth and „dancing“ flames: No one can escape the special fascination and unique charm of a flickering fire. For a classic campfire, however, the home garden is usually taboo, not to mention the terrace. With OUTDOOR FIRES garden fires, on the other hand, you can enjoy the unique flair of an open wood fire comfortably and safely.

So if you would like to enjoy spending warm summer evenings outdoors with family and friends without freezing, OUTDOOR FIRE garden fires provide light and warmth. They spread an incomparable campfire ambience.

OUTDOOR FIRE care instructions

OUTDOOR FIRE garden fires are made of lacquered or enamelled cast iron and should not be exposed to the weather or moisture, unless you want a „rust patina“ for esthetic reasons.

The heat of real wood fire - with the asset of Nordic innovation

Quality is our promise

We have developed our diverse selection of garden fires OUTDOOR FIRE to satisfy the highest expectations of individuality and functionality.

In this industry, LEDA's name stands for tradition, the highest quality, durability, comfort and innovation, like no other! For that matter, quality has been our top priority since the company was founded in 1873.

Efficient, durable, powerful, individual and simply beautiful– to provide you with a lasting feeling of comfort.

When it comes to workmanship, we count on our traditional, highly developed craftsmanship and the constant technological advancement of our products.

In this regard, only the best materials do justice to our demands. Thus we only use our own quality cast iron: the highest quality material in wood burning appliances construction, both then and now. Its lifetime is virtually unlimited, it stores heat, is extremely heat-resistant, dimensionally stable and allows for even the finest contours and designs in its formation.

Furthermore - and this is very close to our hearts - you can enjoy your LEDA stove in comfort and calmness! The reason for this is that the cracking noises which are typical to other materials during their heating up and cooling down do not occur with cast iron - because cast iron stands for quality!

Development and production in Germany

OUTDOOR FIRE garden fires are quality products that are developed entirely in Germany and are manufactured with great care.

Cast iron stands for quality

Development, research and production in Germany

Experience extraordinary fire enjoyment!
The elegant FIRE TOWER brings a unique fire-
place atmosphere in the outdoor area.

A great advantage of the FIRE TOWER is that
the wood is burnt on edge due to its design,
which promises a longer burning time than a
conventional bonfire. With its side openings, the
FIRE TOWER offers a fascinating visual effect that
shows off the flames of the fire to their best
advantage.

DETAILS

h 61cm / w 30 cm / d 30 cm
38 kg / black lacquered

Logs burn upright / clean and safe due to clo-
sed construction / ash box for easy cleaning:
ash residues tumble through the combustion
chamber into the ash box - this makes cleaning
easier/easy lighting: Place the lighting aid on
the ash box, light it, then push the ash box back
- thanks to the optimally positioned lighting aid,
a lively fire immediately/stable, dimensionally
stable and heat-resistant - made of high-quality
cast iron.

FIRE TOWER

For upright fire enjoyment

DETAILS

h 52 cm / w 55 cm / d 33 cm
40 kg / black lacquered

Stable, dimensionally stable and heat-resistant made of high-quality cast iron/ clean and safe due to closed construction / can be complemented with enamelled grill and warming plates.

The FIRE BOX is a true all-rounder. Thanks to its variably insertable base plates, it is just as suitable for using wood logs as it is for classic charcoal grilling. The combined grill and cooking plate available as an accessory is ideal for roasting and keeping meat, fish and vegetables warm.

In addition, the retail trade offers various grill grates that fit perfectly on the FIRE BOX. So whether it's a campfire in the open air, jacket potatoes in the embers, sausages and vegetables on the grill or bread on a stick - all this is possible with this stylish item.

FIRE BOX

For culinary garden fires

Torches in the twilight of the garden have always had a special charm. Especially when they burn with a beautiful, large flame and you can enjoy the fire for hours - without having to worry about it in between.

The large flame burns in a compact fire pot, which is 15 cm high. The burning material is either a wax roll, which is commercially available. Or alternatively, this can be easily made yourself with the help of about 300 grams of melted wax and a toilet paper roll.

DETAILS

h 15 cm / w 14 cm
4,4 kg / black lacquered

Massive fire torch (incl. cover) for one wax roll / stand and dimensionally stable, heat-resistant, made of high quality cast iron / burns 3 - 4 hours with great flame / ready wax roll refills and stainless steel rod Ø 12 mm are available in retail stores. Shaping: kramerDesign

Really beautiful

The bottom of the fire pot has a socket in which a standard stainless steel rod can be attached - for insertion into flower beds, lawns or large flower pots.

FIRE TORCH

For hours of dancing flames

With a diameter of 72 centimetres and a deep curvature, the matt black FIRE TRAY TRIGON offers enough space for several logs. This not only provides a lot of warmth, it also sets the scene particularly well for the dynamics of the original element of fire. And the dark lacquer finish forms a strong contrast as a background to the luminous dance of the flames.

Enjoy unforgettable moments with FIRE TRAY TRIGON on cool summer evenings with an enchanting interplay of flames with the quiet crackling and popping of the fire.

DETAILS

h 38 cm (41,6 with wind rings) / d 72 cm
24 kg / black (matt) lacquered
three elegant inox feet

Solid firetray stand and dimensionally stable, heat-resistant made of high-quality cast iron / clean and safe due to closed construction / upgradeable with enamelled wind rings / effective heat source in campfire style.

Shaping: kramerDesign

Accessories

The high-quality design elements wind rings give the firetray a completely new noble look. They protect against unpleasant ash flying in gusts of wind.

FIRE TRAY TRIGON

Design fire bowl for stylish fire enjoyment

With the BBQ plate you can convert the FIRE-TRAY XL, FIRE TRAY TRIGON and many others into a BBQ. The plate has a frying and a barbecue surface. Also a pot with hot soup or punch can be easily placed on the plate.

DETAILS

h ca. 6 cm (with feet) / d 38 cm
5,5 kg / black enameled
three elegant inox feet

Barbecue plate made of high-quality cast iron/ food-safe enameled / integrated drip tray and drain hole in the middle / removable stainless steel foot elements facilitate cleaning and storage / incl. handle for easy and safe use.

SAFE

The enclosed operating handle allows the plate to be inserted and removed easily and safely. This also makes it easy to add charcoal.

In comparison to a grate, the closed barbecue plate offers additional protection from direct flames.

BBQ PLATE

For FIRE TRAY TRIGON, FIRE TRAY XL and many more

DETAILS

h 7,8 cm / d 50,5 cm
11,3 kg / black (matt) lacquered

Solid fire tray stand and dimensionally stable, heat-resistant made of high-quality cast iron / supplied in five parts - easy to assemble / Optional with stand of five steel feet, 34 cm height. Shaping: kramerDesign

The facets of the tray reflect the light and create a fascinating effect in combination with the beautiful cast surface. To be able to light a crackling fire in your garden, our FIRE TRAY with its modern design, it is a real eye-catcher on the terrace.

Tip

The fire tray becomes particularly useful due to its variety of applications, as it also shines indoors as a fascinating design object. Decorated with candles, flowers or shells from the last holiday, it is a noble eye-catcher.

FIRE TRAY

For multi-faceted moments

The FIRE TRAY XL provides a colorful play of flames on cool evenings and at the same time provides pleasantly cosy warmth in the garden. This high-quality design article is made of solid cast iron.

The geometrically refined facets of the relief surface change, depending on the effect of shine of the flames and thus provide unique effects through the continuous interplay of shape, color and material.

DETAILS

h 12,9 cm / d 72,5 cm
27 kg / black (matt) lacquered
