## ourstory

It started with a simple bonfire in the heart of the Australian continent, under the red Ayers Rock. Two tourists, Alfred Weilandt and Jerry Dabrowski were sitting by the fire, long into the night, listening to Aboriginal tales about a mythical Epoch of Dreams. The atmosphere created by the flames inspired the two to find an easy way to have the same fire in contemporary interiors.

They intended to overcome the existing difficulties in the form of soot, ash and the need for a chimney, all of which are associated with fire in an interior space. Contemporary lifestyle demands products that through design have a character of their own but are safe and easy to use. After months spent on designing and testing, they came up with a product combining the beauty of form and the comfort of use thanks to bioethanol fuel. But most of all a product that satisfies the atavistic need to commune with fire.

## designfire

We took on the challenging task and went beyond all the established boundaries to design fire like never before. Our endeavours lead us to develop solutions that allow us to arrange a natural fire in any space; be it indoor or outdoor.

As a world leader in fully automatic fireplaces, we guarantee the convenience and safety of our products. We listen to our clients carefully to provide individually customized products. Our offer covers net zero bioethanol fireplaces with patented BEV® Technology and gas fire solutions that provide a lot of freedom in designing your perfect space with fire as the focal point.

The recognition says it all. Planika is global. With an extensive distribution network, we are present in over 100 countries around the world. But the success also lies in the concept of a teal organization that Planika adopted. In our company, there is no hierarchy. All the employees are given freedom in managing their working schedule and have a real influence in the process of product creation.

*~This made it possible to give you truly unique solutions in fire design.*

Planika

# BEV<sup>®</sup> TECHNOLOGY

## GAME-CHANGING INNOVATION IN FIREPLACE INDUSTRY

The BEV<sup>®</sup> technology is the most advanced technology on the fireplace market and it has revolutionized the industry. It is now possible to have a line of fire in a media wall under TV, in an apartment on a higher floor, arranged as a room divider or even on a yacht. For years now, this innovative solution has been taking projects with real fire to the next level. You can use fireplaces with the BEV<sup>®</sup> technology anywhere you want, without any limitations. It is manufactured according to UL standards and is O-TL certified, meeting the most demanding safety and quality requirements.

### PLANIKA AUTOMATIC FIRE

Without chimney

No smell, no soot, no ash

No contact between fuel and fire

Controlled by mobile app or a remote

Automatic refuelling

Safety sensors

Real fire

Easy installation

### HOW DOES THE BEV<sup>®</sup> TECHNOLOGY WORK?

The entire burning process is fully automated. The fireplace takes only the required amount of fuel from the tank and the pump transports it to the combustion chamber. The bioethanol is vapourised and distributed along the entire length of the burner where it is then combusted. The fire does not come in any direct contact with the liquid fuel. Thanks to the isolated fuel tank, the cooling fans and the combustion chamber, the temperature of the ethanol fuel is always low and safe.

The microprocessor communicates with many sensors inside the fireplace and controls its entire operation. The fireplace informs you of any actions with a sound signal and a message in the mobile app. The convenient remote control of the fireplace eliminates any risk of human error.

# NET ZERO<sup>®</sup>

## CARBON NEUTRAL SOLUTION FOR PREMIUM DESIGN

Planika's mission is to create safe fireplaces that leave little to no impact on the environment. Our automatic fireplaces with the BEV<sup>®</sup> technology are fuelled with bioethanol - organic eco-fuel. This allows to use our products where traditional fireplaces are prohibited by the environmental restrictions. Planika has developed the cutting-edge solution - the true CO<sub>2</sub> - neutral fireplaces of the future.

### WHAT IS FANOLA FUEL?

- ✓ 96% ethanol concentration
- ✓ odourless and clean combustion
- ✓ plant-origin distillate
- ✓ particulate-free
- ✓ multi-distilled
- ✓ pharmaceutical quality
- ✓ natural, golden flame

### HOW ARE PLANIKA'S BEV<sup>®</sup> FIREPLACES CO<sub>2</sub> NEURAL?

Planika's fireplaces utilize multi-rectified bioethanol which is made from plants, such as wheat, corn or potatoes. The BEV<sup>®</sup> Technology turns liquid fuel into ethanol vapours to provide the safest combustion process and the most natural fire. The clean burning of ethanol vapours emits only a small amount of CO<sub>2</sub> - similar to that exhaled by a human. No ash, soot, or smoke are produced. 100% of the emissions are absorbed by the same plants that are used to produce the biofuel. This way the carbon emission process comes full circle.

# AUTOMATIC BEV<sup>®</sup> FIREPLACES

# INDOOR ETHANOL FIRES

AUTOMATIC ETHANOL BURNER (Net Zero® fireplace with BEV® Technology)

## FIRE LINE AUTOMATIC 3 (FLA3 BURNER)

### FEATURES

- Automatic refilling system
- Remote control
- Wi-Fi
- 6 levels of flame
- Safety sensors
- Variant with larger fuel tank (FLA3+)
- Smart Home System compatible
- Top finish:
  - Black powder coating (standard)
  - Stainless steel (optional)
  - RAL colour (optional)

## FIRE LINE AUTOMATIC 3+ (FLA3+ BURNER)

### OPTIONAL ACCESSORIES

- Glass screens
- Decorative tray with logs or stones
- Smart Home System module

# INDOOR ETHANOL FIRES

AUTOMATIC ETHANOL FIREPLACE (Net Zero® fireplace with BEV® Technology)

## FORMA FIREPLACE (with FLA3 / FLA3+ burner)

### FEATURES

- FLA3/FLA3+ technical features
- Zero clearance – installation in combustible materials
- Heat deflector - mount TV above the fireplace
- 6 lengths and 7 arrangement options
- Easy installation
- Higher side glass panels available in Tunnel, Room Divider and Island models

### OPTIONAL ACCESSORIES

- Decorative tray with logs or stones
- Smart Home System module

## ASTRO FIREPLACE

### REFLEX TECHNOLOGY

A system of prisms and LED lights that provides more visual depth than a regular 2-dimensional fireplace. The warm-coloured mirror installed on the back wall enlarges the flame giving you a more natural experience.

### HEATFLOW SYSTEM

Astro not only decorates but also warms up your home. Take advantage of the 2-stage heater to enjoy cosy winter evenings.

### CONTROL OPTIONS

### YOU DESIGN!

Enjoy the three-sided panoramic flame or cover the sides of Astro with the included panels. By framing the fire you get three additional arrangement options.

### MULTIZONE COLORFLOW

The Multizone Colorflow let's you give Astro your own look. There are three lighting zones, each with individual colour settings.
